DOUBLE-SIDED LABELING MACHINE

DESCRIPTION

NP-TS Double Sides Labeling Machine is widely application for the container pasting with two front and back labels, it is one type of self adhesive labeling machine, single and double side labeling is option, using for round container, square and flat container, also carton, boxes ,ect. It is automatic controlled by PLC easy operating. It can change specifications easily. It adopts servo motor, achieved closed loop control low malfunction rate. High efficiency.

NP-TS two sides labeling machine is Mostly applicable for square, flat bottles, round containers for medicine, daily chemical, cosmetics, food cultural supplies, Electronic and etc.

Advantages:

1. PLC CONTROL, Automatically check the length of labels
2. Equipped with warning device of insufficient labels, broken labels
3. No bottle, no labeling
4. No labels, no labeling
5. Servo motor control, stable labeling

SPECIFICATION

1.	Machine Size	2800 (L) x1450 (W) x1360 (H) mm Height
2.	Label Object	30-280mm(according to customer samples)
3.	Thickly Label object	20-200mm
4.	Label Height	5-150mm
5.	Label Length	25-300mm
6.	Pastes the sign precision	±1mm
7.	Roll inside	76mm
8.	Roll Outside Diameter	380mm
9.	Power Supply	110/220V1.5HP50/60HZ
10.	Air compressor	5Kg/cm ²
